

We would be happy to share our observations with the town's consultant if that would be helpful.

Amanda,

So we are aware of what may have transpired in your review, could you tell me if any staff had conversations with the design engineer in regards to the "unusual" and "unconventional design"? Am I understanding that the stormwater plan does not fit "standard" practice? Thanks, Bruce

Subject: Economy Paving

Bruce,

Given the unusual circumstances of the Economy Paving stormwater permit, and the unconventional design analyses and features used on the site, SWCD feels it would be appropriate for the Town to secure the services of an engineer familiar with these methods to evaluate the project and provide feedback to the Town and design engineer.
